```
#3
select OrderID, OrderDate, CustomerID, EmployeeID,ShipperID, sum(Quantity * Price) as OrderTotal
from orders
join order_details using (OrderID)
join products using (ProductID)
where month(OrderDate) = 11
group by OrderID
order by OrderDate;
```

```
#4
select OrderID, OrderDate, ShipperID, ShipperName
from shippers
join orders using (ShipperID)
where month(OrderDate) = 11
order by OrderDate, OrderID asc;
```

```sql
select EmployeeID, concat(FirstName, ' ', LastName) As
EmployeeName, format(sum(Price * Quantity), 2) as
TotalValuesOfOrder
from employees
join orders using (EmployeeID)
join order_details using (OrderID)
join products using (ProductID)
group by EmployeeID
order by TotalValuesOfOrder desc
limit 10;
```

ข้อ 5

```sql
SELECT OrderID,ProductID, Quantity
FROM order_details
WHERE ProductID IN (SELECT ProductID FROM products WHERE
SupplierID in
(SELECT SupplierID FROM suppliers WHERE SupplierName =
'Tokyo Traders'));
```
